

Amendments to Claims

- 1.(Currently Amended) An integral structure comprising a metal surface and a plastic member that comprises a surface, said metal and plastic surfaces joined by one or more fastening means, wherein said fastening means comprises a head assembly attached to and/or formed from the metal surface, over, around, and/or within which
said plastic member is injection molded.
2. (Current) The integral structure of Claim 1 wherein said [fastening means] head assembly comprises a head portion and a neck portion joined thereto forming an undercut.
3. (Original) The integral structure of Claim 1 further comprising plastic ribs interconnected along said metal surface.
4. (Original) The integral structure of Claim 3 wherein said plastic surface and plastic ribs are selected from the group consisting of polyamides, polyesters, and liquid crystalline polymers.
5. (Current) The integral structure of Claim 2 wherein said head assembly further comprises one or more apertures formed through said head and/or said neck portion.
6. (Original) An article made from the integral structure of Claim 1.
7. (Original) A front end module made from the integral structure of Claim 1.
